

Treatment of Opioid Use Disorder Preferred/Formulary Drugs for Fee-for-Service, Medallion 4.0 and Commonwealth Coordinated Care (CCC) Plus Health Plans

The following drugs **do not require a prior authorization (PA)** when prescribed by buprenorphine waived practitioner (BWP) who is an in-network/credentialed with a managed care health plan:

- naltrexone (oral)
- Suboxone[®] film
- Vivitrol[®] (naltrexone injection)
- buprenorphine monoprodukt $\leq 16\text{mg/day}$

Sublocade requires all BWPs including BWPs associated with preferred OBOTs to submit a clinical service authorization.

The opioid antagonists below may be written by any in-network/credentialed prescriber:

- naloxone syringe & vial
- naltrexone tab
- Narcan[®] Nasal Spray
- Vivitrol[®]

The following drugs **require a PA** when prescribed by BWP who is in-network/credentialed with a managed care health plan:

- buprenorphine monoprodukt $>16\text{mg/day}$
- Bunavail TM
- buprenorphine/naloxone tab SL
- buprenorphine/naloxone film SL
- Cassipa[®]
- Probuphine[®]
- Zubsolv
- Evzio[®] injection

All Buprenorphine Containing Drugs (non-preferred) and Envio require submission of a service authorization.

Prescriptions written by BWPs who are not in-network or credentialed with a Medicaid managed care health plan are not reimbursable through Medicaid.

DMAS Managed Care Health Plans include:

- Aetna Better Health
- Anthem HealthKeepers
- Magellan Complete Care
- Optima Family Health
- United Healthcare
- Virginia Premier
